SUMMARY

Senior Software Engineer with 8+ years of experience designing and building **scalable backend systems** using **Java, Spring Boot**, and **Microservices**. Strong expertise in **distributed systems**, **event-driven architectures** using **Apache Kafka**, **concurrency**, and **system design**, including **High-Level Design (HLD)** and **Low-Level Design (LLD)** of large-scale services. Proven track record of owning **end-to-end delivery**, from **architecture and design** to development and **production deployments on AWS**, with a focus on **performance optimization**, **operational stability**, and **fault-tolerant, high-throughput systems** in fast-paced product environments.

TECHNICAL SKILLS

Programming Languages: Java (8, 11, 21), Python
Backend & APIs: Spring Boot, Spring MVC, REST APIs, Microservices Architecture, Hibernate/JPA, API Design, SOLID Principles, Design Patterns
Distributed Systems: Apache Kafka, Event-Driven Architecture, Asynchronous Processing, Multithreading, Concurrency, Fault Tolerance, High Availability, Scalability
Databases: PostgreSQL, MongoDB, DynamoDB, SQL, NoSQL
Cloud & DevOps: AWS (ECS, EKS, S3, API Gateway, Route53, Lambda, CloudFormation), Docker, Jenkins, CI/CD Pipelines
Testing & Quality: JUnit, Mockito, JMeter, SonarQube
Observability: Datadog, Splunk, Performance Optimization, Production Support

EXPERIENCE

Senior Software Engineer

Mar 2023 — Till Now

Empower

Bengaluru

- Designed, developed, and owned **scalable backend microservices** using **Java** and **Spring Boot** in a **distributed architecture**. Provided **technical leadership** by leading **design reviews**, mentoring **junior engineers**, and driving **engineering best practices** across backend microservices.
- Built **event-driven systems** using **Apache Kafka** to enable **asynchronous processing** and improve **scalability and reliability**.
- Designed **composite REST APIs**, aggregating multiple downstream services to reduce client orchestration complexity.
- Optimized **customer onboarding APIs** using **multithreading and concurrency**, improving **throughput** and reducing **response latency**.
- Developed an **internal automation tool** to streamline **Spring Boot version upgrades**, improving **release reliability**.
- Delivered **serverless workloads** using **AWS Lambda** (Python) for **event-driven use cases**.
- Led **performance testing** using **JMeter** and automated **CI/CD pipelines** with **Jenkins** and **Docker**.
- Provisioned infrastructure using **AWS CloudFormation** and supported **container orchestration**.

Senior Software Engineer

Nov 2021 — Mar 2023

IBM (Client: Mercedes-Benz R&D India)

Bengaluru

- Delivered backend features using **Java 11** and **Spring Boot** for a **production-grade application** serving **thousands of users**.
- Refactored legacy modules following **SOLID principles** and **object-oriented design**, reducing **code complexity**.
- Improved application stability through **JVM-level debugging** and **multithreading optimizations**.
- Implemented **CI/CD pipelines** using **Azure DevOps** and owned **production deployments and support**.
- Increased reliability through **unit testing** with **JUnit** and **Mockito**, enforcing **SonarQube** quality standards.

Senior Software Engineer

Mar 2021 — Nov 2021

Platform 3 Solutions

Chennai

- Implemented **Spring Batch pipelines** to process **high-volume flat files**, handling **hundreds of thousands of records per job**.
- Built **performance benchmarking reports**, driving **15–20% improvements** in batch execution time.
- Developed a **DB2 Mainframe connector** to ingest enterprise data into **InfoArchive**, enabling **new client onboarding**.
- Automated deployments using **Jenkins pipelines** and **Docker images**, reducing **manual release effort**.

Software Engineer

Aug 2018 — Mar 2021

Opteamix India Pvt. Ltd.

Bengaluru

- Developed backend services using **Java** and **Spring Boot** in a **service-oriented architecture**.
- Reduced **application load time by 20%** by optimizing **REST API interactions**.
- Implemented **CRON-based job scheduling** to automate **background workflows and notifications**.
- Built **business logic** for **periodic performance evaluation** and reporting systems.

EDUCATION

B.Tech Computer Science & Engineering, GNDEC Ludhiana, Percentage: 76

Aug 2014 — June 2018
